Owner of Record: Jill Burnell

EVA Status: Positive

Breeder's Terms: \$1,400. stud fee.
LFG

Origin: Redwine is a beautiful imported 8-year-old black Hanoverian stallion with superb bloodlines. His sire, Rotspoon, is by the legendary stallion Rubinstein I who is widely known for throwing rideability and trainability in his offspring. His damsire is the highly prized, Matcho AA, who has produced no less than 20 approved sons and an impressive list of outstanding daughters that have proven to be exceptional broodmares.

Performance Record: Redwine is a modern, elegant black Hanoverian stallion possessing sheer beauty and presence of a class rarely seen. He completed the 30 day and 70 day testing in Germany and was awarded admirable scores in all areas, most notably, rare 10's for character, constitution and rideability. His striking appearance is accentuated by his lovely hunter movement and impressive style over fences. Due to his popularity with mare owners, Redwine has had little time for competing, but most recently he has been showing with great success in the hunter ring with John French. Redwine has also been shown, winning in the dressage ring with scores over 70%. Redwine made his debut in the Dressage arena in September 2009, with scores over 70% at Training Level. We look forward to watching Redwine move up the levels when he's not winning in the hunter ring.

Breeding/Progeny Record: Redwine has quickly established himself as a consistent producer of incredibly beautiful, correct foals with a significant trademark of stunning heads, long, shapely necks, and gorgeous toplines. His foals also share his noble charm and quality of disposition. This marked prepotency has enabled him to reliably improve on mares of virtually any type. His foals have been well-received at inspections across the country, with a large number being awarded site champion designations. In only two years of breeding, he has produced some of the highest scoring foals in the country! Along with incredible good looks and temperament, Redwine foals are stamped with elastic, cadenced movement of hunter type. They are proving to be desirable candidates for the hunter breeding ring while awaiting debut in their under saddle careers.
