**Origin/Performance Record:** Futurist won an International Jumping class at the 2006 Spruce Meadows Masters in Calgary. In 2007 he has been shown very successfully in the Regular Working Hunters.

He is a son of double Olympic Gold Medal Champion and 2000 Hanoverian Stallion of the Year, For Pleasure, one of the most successful producers of International Show Jumpers. Futurist excelled in his stallion performance test, achieving high marks in both the rideability and the jumping phase of the test.

After winning show jumping ability classes as a four and five year old in Germany, Futurist continued his very successful jumping career in North America. In 2001, he won several six-year-old show jumping classes in Florida and North Carolina. He then swept the Jumper Development Series in Canada, winning the Ontario Championships, the Eastern Finals and the National Finals at the Royal Winter Fair.

In 2004, Futurist was the Ontario Open Jumper Champion under Erynn Ballard, a major success, as Erynn only met the stallion at horse shows but did not train him throughout the year. In 2006, Futurist had another successful year with Erynn Ballard, the highlight being winning an international class at the prestigious Spruce Meadows Masters.

**Breeding/Progeny Record:** Futurist exemplifies the modern type Hanoverian performance horse. His offspring are typically rather refined, with good movement and extraordinary scope and technique over jumps. Futurist has produced several Royal Winter Fair Champion line horses. His oldest crop of foals in North America turned five in 2007 and collected ribbons in both the hunter and jumper ring in Canada and the United States. Fabiana W was the 2006 Champion of the Canadian Jumper Performance Futurity in Eastern Canada. Pretty Woman and Fresno have excelled in Baby Green Hunter classes in the US. Please request our DVD to see Futurist and his offspring perform.

Both cooled and frozen semen is available. Semen can be shipped from Canada into the US without any restrictions or permits.
